

BCNSOLAR

UVA + UVB protection

BCN Solar protects the skin against UV rays, avoiding their harmful effects such as early ageing, cellular damages and hyperpigmentation. Its formula contains Silanetriol, Carcinine, Vitamin C, Vitamin E and camomile essential oil extract, in addition to several solar filters combined with micronized titanium dioxide. BCN Solar delivers the following specific benefits:

- ✓ Protects the skin from UVA and UVB rays.
- ✓ Activates the synthesis of heat shock proteins (HSP) to avoid protein destruction and cellular lysis produced after an increase of dermal temperature.
- ✓ Has an anti-dehydration and anti-dryness effect, necessary to counteract the highly dehydrating action of solar exposure.
- ✓ Detoxifies and repairs the skin, protecting it against oxidative stress.
- ✓ Maintains functions and metabolic activities of skin cells.
- ✓ Prevents and repairs damages caused by solar aggressions, keeping the skin healthy and firm.
- ✓ Reduces and avoids the solar erythema. Calming effect.

For optimal results, BCN Solar is the indispensable cosmetic complement to your professional medical-aesthetic treatment.

Indications

Sun protection specially indicated for use before and after professional medical-aesthetic treatments such as mesotherapy, microneedling, peeling, laser, pulsed light, dermabrasion, etc.
